

## Fine Arts Imaging

I have owned and operated Fine Arts Imaging for over 27 years, serving the Tri-State area's finest museums, galleries, publishers, artists and designers. I personally handle all communication with clients, as well as the photography, design and prompt delivery of all jobs.

I use a state of the art dslr camera along with professional editing software, and also shoot all traditional film formats (35mm, 4x5 & 8x10 view cameras). My professional scanners can acquire digital images from both flat art or film. I can convert your slides to digital files and format them to any specifications (web optimized files, medium sized jpg's for submissions and up to 700mb files for large format Giclee Prints).

## Fine Arts Atelier

Giclee Prints have become a strong bread and butter industry for many artists and galleries. The archival quality of the materials (inks, papers and canvases) used, as well as the imaging of the original art, is crucial for fine giclees. I work very closely with each artist to provide the best pairing of materials along with a stunning reproduction of the original artwork. I can provide many examples on both canvas and paper.

## Web Design

I specialize in web sites for the fine arts industry. I began the web building service 10 years ago with the intention of providing artists with affordable and elegant sites, which are easy to navigate.

## Complete Design, & Printing Services

I can provide extensive samples of books, business cards, announcement cards and catalogs.
